MEXICO'S SIGN LANGUAGE. Gestures With a Meaning Understood

by Every Tribe. but above the Indian dialects and Spanish there is one universal language, the language of signs. It is the most expressive of all. The Mexican eye and hand are eloquent members. It is capable of infinite variation, Its shadings and suggestions are beyond all translation. But there are certain

gestures that have a fixed meaning, a

signification well understood by every

nation and every tribe from Guatemain to Texas. A general upward movement of the body, shoulders shrugged, eyebrows raised, lips pouted and palms outspread varies in meaning from "I don't know and I don't care" to a most respectful "Really, sir, I do not under

stand you." The index finger moved rapidly from right to left generally before the face means "No more" or simply "No." Ta move the right hand palm outward means "Just wait; I'll be even with

you yet." The index finger on the temple moved with a boring twist means

"He's drunk." The right hand held to the lips, three fingers doubled, thumb and little finger erect, varies from "He drinks" to

"Have one with me." To move the open hand over the cheek in imitation of a razor has reference to the idiom "playing the bar ber" and means "to flatter."

All four fingers and the thumb held points together and moved toward the mouth means "to eat." The right hand held before the face, the two middle fingers moving rapidly, is a familiar salutation,-"Modern Mex-

In the United States "right hand" yarn is yarn of which the twist slopes up to the right similar to the threads of an ordinary right hand screw. Germans call this "left hand" yard for the reason that if held in the hand it has to be twisted to the left to twist it agether, whereas twisting to the

CROPS GROW WITHOUT RAIN How the Syrian Peasant Makes Use of

the Moist Subsoil. In Syria and Palestine from the beginning of April until October there is practically no rain, yet in July the fields teem with a vigorous growth of

watermelons, tomatoes, cucumbers,

etc., all flourishing without artificial watering, although at that time no rain has failen for many weeks. In fact, the Syrian peasant from the moment his seed has been sown prays. that no rain may fall. During the period of growth of a crop the surface of the soil to a depth of six or eight inches is perfectly dry and loose. Below this surface layer will be found moist soil, in which the roots extend and grow vigorously. In this moist subsoil plants continue to grow until late autumn. When the crop is re-

moved in the autumn the rains com-

mence, and the land is plowed after each heavy rain as soon as the soil begins to dry. Two primary objects are kept in view in plowing-to furnish a favorable surface for taking up all the water and to prevent its upward evaporation from the subsoil. The great point is to keep the upper six inches of soil perfectly loose and friable, so that the moisture from below is not drawn upward and lost in evaporation, but does not ascend higher than the compact

plow. For this reason the plowing is

shallow, averaging from four to six

inches in depth. When the time for sowing the seed arrives the land is plowed to a depth of about six inches and the seed is sown from an arrangement attached and is covered by the soll closing over behind the plowshare. From this time the upper stratum of loose soil prevents the escape of moisture upward beyond the wet subsoil on which the seeds rest and into which their roots after the process of germination spread.-Chicago Tribune.

The farm, stock and tools of the W. L. George estate, located on the Plainfield road, 4 miles out of Barre city, are offered for sale. The farm contains about 100 acres, has good buildings, the barn and silo being new. There is a splendid sugar orchard on the place. Keeps 23 cows.
